

Advocacy committee working meeting congress summary

Monday 19 June 11.00-12.30

During the working meeting we evaluated results from the past year and explored possible ways forward. The survey results clearly indicated that our membership would like to have sample documentation and guidelines available on the webpage so we discussed possible themes and core documentation strands on which to focus. We also considered how IAML can be far more public and visible in its work, commitments and statements.
