

IAML-L 2015-16 Report

As of Monday, 27 June 2016, IAML-L had 716 subscribers, an increase of 24 subscribers since July 2015. Subscription increases were steady throughout the year, with largest increase occurring in May 2016.

The Lyris software platform remains stable: In the past 12 months, 337 individual messages were sent to 226,033 recipients and the success rate continues to hover at or above 99% (undelivered messages can be traced to expired/changed e-mail addresses). I renewed IAML-L in mid-May 2016. This is an annual event, and allows Cornell to confirm that hosted lists still are active.

Last year, I was pleased to report that updated IAML-L instructions had been posted to the IAML web page, in both English and German. The French translation has been completed and added to the IAML web site.

I am glad to be part of providing this service to the IAML community: IAML-L requires little maintenance, and I spend less than an hour per month monitoring the list.

Respectfully submitted,

Bonna J. Boettcher

Listowner, IAML-L
