Croatia, report 2010

The small group of 11 enthusiasts from music libraries in Croatia has been pretty busy this year – we got the first ever and also a good sum of money from our Ministry of Culture. It is possible now to finish the project of digitising rare materials and the production of a promotional CD and web-page about our first musicologist – Franjo Ksaver Kuhac. For his 100th anniversary in 2011, information about Kuhac will be promoted to the Croatian and international public.

We made a list of remarks to the Croatian copyright law, concerning the impossibility of multiplying music materials for preserving by digitisation and we presented it to the Croatian Librarians Society, waiting to pass it on to the legislators.

Our members are active in RILM and RISM projects, and are also trying to participate in RIPM.

We are continuing the good practice of exchanging library-materials and experiences among the whole Croatian music librarian and archivist community.

Željka Radovinovic

President, IAML (Croatia)
