

IAML-L – 2016-17 Report

As of Monday, 5 June 2017, IAML-L had 714 subscribers, a decrease of 2 subscribers since June 2016. Subscription numbers were steady throughout the year.

The Lyris software platform remains stable: In the past 12 months, 277 individual messages were sent to 188,356 recipients and the success rate hovers at or above 98% (undelivered messages can be traced to expired/changed e-mail addresses, and also server downtime at Cornell). I renewed IAML-L on 4 May 2017. This is an annual event, and allows Cornell to confirm that hosted lists still are active.

I am glad to continue to be part of providing this service to the IAML community: IAML-L requires little maintenance, and I spend less than an hour per month monitoring the list.

Respectfully submitted,

Bonna J. Boettcher

Listowner, IAML-L
