Conclusions and next steps

Lack of access to physical collections is a significant problem for all music libraries

Recommendations around managing the current crisis and towards future disaster planning and a constantly changing new normal are required. How can IAML fulfil its role of promoting a better understanding of the cultural importance of music and music institutions in a socially distanced world?

Online music resources are potentially rich in content and diverse in format. There is huge unexplored potential for future developments. Continued communication between stakeholders in the provision of online content will be beneficial to all.

Strong feeling of community within IAML is an excellent starting point for international cooperation. We can build on this to reach out to music and library organizations worldwide.
